VALUATION AT UK RETAIL VALUE- FOR THE PURPOSE OF INSURANCE COVER

Dear Sir/Madam,

We are pleased to submit herewith your valuation for the purpose of insurance replacement. It is not valid for any other purpose. The valuation incorporates different sections, this submission statement, the schedule of property, the appraiser's declaration, an image gallery and the notes to schedule. All sections are relevant to, and form an integral part of, this valuation, which should be read as a whole and the document itself is only valid in its entirety.

For clarification, the values are based upon current UK high street retail prices and these include such prices quoted by designer houses for bespoke items and the recommended retail prices for specific models of named watch brands, as and where appropriate.

We take this opportunity to confirm that the appraiser has any past, present or contemplated interest in the property described within this schedule and further confirm that the fee paid for the provision of this valuation is not contingent upon values ascribed to same.

For your information, appraisers are obliged to determine values for the property examined that are current as at the date of appraisal and these values necessarily need to reflect price trends, which are based upon market forces and fashion at that given date. Such are controlled by supply and demand and can also be affected by currency exchange rates and the price of bullion. Precious metals and gemstones are traded universally in US\$ dollars and global political situations and/or international market can cause worldwide fluctuations in exchange rates. With such variables, it is inevitable that values of the same property will fluctuate through different periods of time.

These items have been examined with great care so that we may present a fully researched report. However, when opportunity arises, the diamonds and/or gemstones should be cleaned, unmounted and submitted to a recognised laboratory for grading as even one or two colour/clarity grade differences can have an effect on the final value. The replacement value has been based upon estimations and assessments within the limitations exposed by the mount and no responsibility can be assumed if the diamonds weight or any of the quality assessments differ from those specified in any Diamond Grading Report subsequently produced or undertaken, as these would have been ascertained in controlled laboratory condition with the diamonds and/or gemstones were unmounted.

We take this opportunity to thank you for instructing us in this matter and trust you will find everything in order. However, should you have any queries, or if you consider that we have misunderstood and/or misinterpreted your instructions in any way, please do not hesitate to contact us.
